## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of the invention of Group I, Claims 1-5, 7-14 and 16-19, in the reply filed on August 8, 2005 is acknowledged. NOTE: It is noted that the Election of Species requirement for Group I has been withdrawn as Claims 2-5, 7-14 and 17-19 have been rejoined with generic Claims 1 and 16. However, the restriction requirement between Group I and Group II is hereby maintained.
2. Claims 6, 15, 20 and 21 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 9, 2005.

### ***Drawings***

3. Figure 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Allowable Subject Matter***

4. The following is a statement of reasons for the indication of allowable subject matter.

Art Unit: 3729

The prior art does not teach all of the limitations of the claimed invention including performing a photolithographic patterning step for defining a designed height of an embedded read element; and performing a further photolithographic patterning step for defining a designed width of the embedded read element (as required in each of Claims 1 and 16).

For example, the reference to Zammit teaches a patterning step for defining a height of the read element and a patterning step for defining a width of the read element. However, the steps of Zammit are not equivalent steps as claimed because Zammit does not teach any photolithographic patterning.

Accordingly, Claims 1-5, 7-14 and 16-19 are allowed.

### ***Conclusion***

5. This application is in condition for allowance except for the following formal matters:

The drawing changes suggested above and cancellation of claims directed to the non-elected invention.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
